- a) An element with greater value is always in front of an element with lower value.
 - b) An element with lower value is always in front of an element with greater value.

- c) An element is not dependent on z-index.
d) None of the above.
26. What is the output of the following JS code?
- ```
const x = 20;
x = 15;
console.log(x);
```
- a) x = 15  
b) x = 20  
c) Error: assignment to constant variable  
d) None of the above
27. 

```
const y = "Indian";
console.log(y[6], y.length);
```
- What is the output of the above code?
- a) n, 6  
b) n, 8  
c) undefined, 6  
d) “, 8
28. 

```
let array = ["Bill", "Jill", "Rachel"];
array.unshift("Jack");
console.log(array);
```
- What is the output of the above code?
- a) ["Rachel", "Bill", "Jill", "Jack"]  
b) ["Bill", "Jill", "Rachel", "Jack"]  
c) ["Bill", "Jill", "Jack", "Rachel"]  
d) ["Jack", "Bill", "Jill", "Rachel"]
29. Which of the following are the data types used in JS?

- a) Number
  - b) String
  - c) Boolean
  - d) All of the above
30.  $i = i + 10 \rightarrow$  The statement is same as
- a)  $i =+ 10$
  - b)  $i += 10$
  - c)  $i = i - 10$
  - d) None of the above
31. 

```
const sum = function (p, q) {
 return p + q;
};
const s = sum(2, 3);
console.log(s);
```
- The output of the function is
- a)  $s = 23$
  - b) Error
  - c)  $s = 5$
  - d) None of the above
32. 

```
let person = {
 fname: "Joe",
 lname: "Biden",
 age: 70,
 fullname: function () {
 return this.fname + " " + this.lname;
 },
};
console.log(person.fullname);
```

The output of the above console.log() is

- a) Joe Biden
- b) f () {  
    return this.fname + " " + this.lname;  
}
- c) Undefined
- d) this.Joe this.Biden

33. Which of the following is true about the switch statement?

- a) default is compulsory at the end of the switch statement.
- b) break causes the switch execution to stop.
- c) Only limited number of cases can be define.
- d) Apart from values and expressions, arrays and objects can be passed to switch statement.

34. Which of the following statements is true about JS hoisting?

- a) Moving declarations to the top.
- b) A variable can be declared after it has been used.
- c) A variable can be used before it has been declared.
- d) All of the above.

35. What is JSON?

- a) JavaScript Object Notation.
- b) Data interchange format.
- c) Language independent.
- d) All of the above

36. Which of the following DOM methods is used to change the colour of HTML element with id=p2 ?

- a) `document.getElementById("p2").colour.style = "blue";`
- b) `document.getElementById(p2).style.colour = "blue";`
- c) `document.getElementById("p2").style.colour = blue;`
- d) `document.getElementById("p2").style.colour = "blue";`

37.

```
<html>
<body>
 <h1 onclick="changeText(this)">Click on this text!</h1>
 <script>
 function changeText(id) {
 id.innerHTML = "Ooops!";
 }
 </script>
</body>
</html>
```

- a) Ooops!
- b) Ooops
- c) "Ooops!"
- d) Click on this text.

38. How to display the title of a document using DOM?

- a) `document.meta.title`
- b) `document.innerHTML`
- c) `document.title`
- d) `document.head.title`

- a) `hello = () => "Hello World!";`
- b) `hello => () = "Hello World!";`
- c) `hello() => "Hello World!";`
- d) None of the above

41. 'this' keyword has the following properties, except

- a) It refers to the current object in the method.
- b) In a function, it refers to global object.
- c) In an event, it refers to the element that received the event.
- d) In an arrow function, it refers to the window object.

42. Which of the following DOM methods is used to replace HTML elements?

- a) `insertBefore()`
- b) `appendChild()`
- c) `createElement()`
- d) `insertBefore()`

43. What is purpose of closures?

- a) Global variables can be made local with closures.
- b) Local variables can be made global with closures.
- c) Global variables and local variables can change their scope using closures.
- d) None of the above.

44. Which of the following are pop-up boxes?

- a) Alert
- b) Confirm
- c) Prompt
- d) All of the above

45. JavaScript uses the plus operator for

- a) Addition of two numbers.
- b) Concatenation of two strings.
- c) Joining a number and a string.
- d) None of the above.

46.

```
var str = "The position of find in this string is";
var pos = str.indexOf("find");
```

What is the output of the following code?

- a) 16
- b) 15
- c) 17
- d) None of the above.

47. The engine that runs javascript code on chrome browser is

- a) V8 engine
- b) SpiderMonkey
- c) Chakra
- d) JavaScript Core

48. What is the output of the following code?

```
Math.floor(Math.random() * 10);
```

- a) Any number from 1 to 9.
- b) Any number from 1 to 100.
- c) Any number from 0 to 10.
- d) Any number from 0 to 9.

49. JavaScript debugging is possible by

- a) Console.log() statements.

- b) Debugger
- c) Setting breakpoints
- d) None of the above.

50. What is the code for the following output?

Sat Mar 20 2021 10:33:30 GMT+0530 (India Standard Time)

- a) `var d = new Date(2021, 2, 20, 10, 33, 30, 0);`
- b) `var d = new Date(2021, 20, 3, 10, 33, 30, 0);`
- c) `var d = new Date(2021, 3, 20, 10, 33, 30, 0);`
- d) `var d = new Date(2021, 20, 2, 30, 33, 10, 0);`

51. Which of the following are used to catch an error in JS?

- a) try, catch, throw, finally
- b) try, catch, error
- c) print, catch, error, throw
- d) console.log, scan, print

52. Multiline strings and embedding expressions can be done by using

- a) Arrays
- b) Objects
- c) String Methods
- d) Template Literals

53. Which of the following is correct?

- a) HTML was written by Tim Berners-Lee in 1993.
- b) CSS was developed by **Håkon Wium Lie** in **1994**.
- c) JS was developed by Brenden Eich in 1995.

d) All of the above.
